What can and can't go in my skip?

Helpful guide on the items and substances that can and can't go into a general waste skip.

Phone: 01666 505800

ITEMS ACCEPTABLE:

The general waste skips are great for household clearances, garden landscaping, kitchen/bathroom fit outs and so much more.

We can take a large variety of items in our general waste skips ranging from washing machines to fence panels to unwanted furniture.

However, there are certain substances and specific items we either have an additional charge for or categorically cannot take. These are listed within this brochure.

ADDITIONAL CHARGE ITEMS:

Some specific items and substances are rejected from our recycling transfer centre and so must be taken elsewhere to be processed which therefore leads to additional costs.

These include:

- ❖ Asbestos – this dangerous substance must be handled and disposed with the greatest care. Therefore, categorically **MUST NOT** be mixed in the skip. Please contact us if you believe you have asbestos present.
- ❖ Plasterboard – can be placed on top of the skip but sealed in a bag and the office and driver must be notified.
- ❖ Tyres – both car and lorry
- ❖ Fridges/Freezers

ITEMS/SUBSTANCES NOT ACCEPTED:

On the other hand, there are specific items and substances that we categorically cannot take as they cannot be processed or transferred from our recycling centre.

These include:

- ❖ Oil
- ❖ Oil based paints – Gloss
- ❖ Creosote
- ❖ Wood treatment
- ❖ Sleepers
- ❖ Bitumen roofing sheets
